UNITED STATES SYSTEMS MODEL

Public Edition / Version 1.0

A Simple Plan to Help Every Person in America Live a Safe, Healthy, and Stable Life

Developed by Uma Petersen

2026 | Independent research and systems-design proposal

READING & PUBLICATION NOTE

This edition is a design-focused reformat of the supplied United States Systems Model v1.0. The author's original proposals, narrative, and supplied visual figures have been retained as source material; layout, hierarchy, spacing, and page furniture have been updated for readability.

Research status. This is an independent, proposed systems architecture. It has not been independently fact-checked, peer reviewed, costed, or experimentally validated as part of this redesign. Assertions about historical uniqueness, causal outcomes, feasibility, or expected impacts should be treated as author claims or proposed outcomes rather than established findings.

Figures. Original illustrations are reproduced from the supplied files. Some embedded labels and figure-caption relationships may require a separate content audit; no new evidence or sources have been added.

Editorial scope. Visual redesign only. Before public release, a separate evidence, legal feasibility, and policy-impact review is recommended.

AUTHOR / UMA PETERSEN • SOURCE / US SYSTEMS MODEL v1.0 • 2026

INTRODUCTION — WHAT THIS MODEL IS

America is using a government plan that is over 250 years old. The world is different now. People are different. Our problems are different. But our system stayed the same.

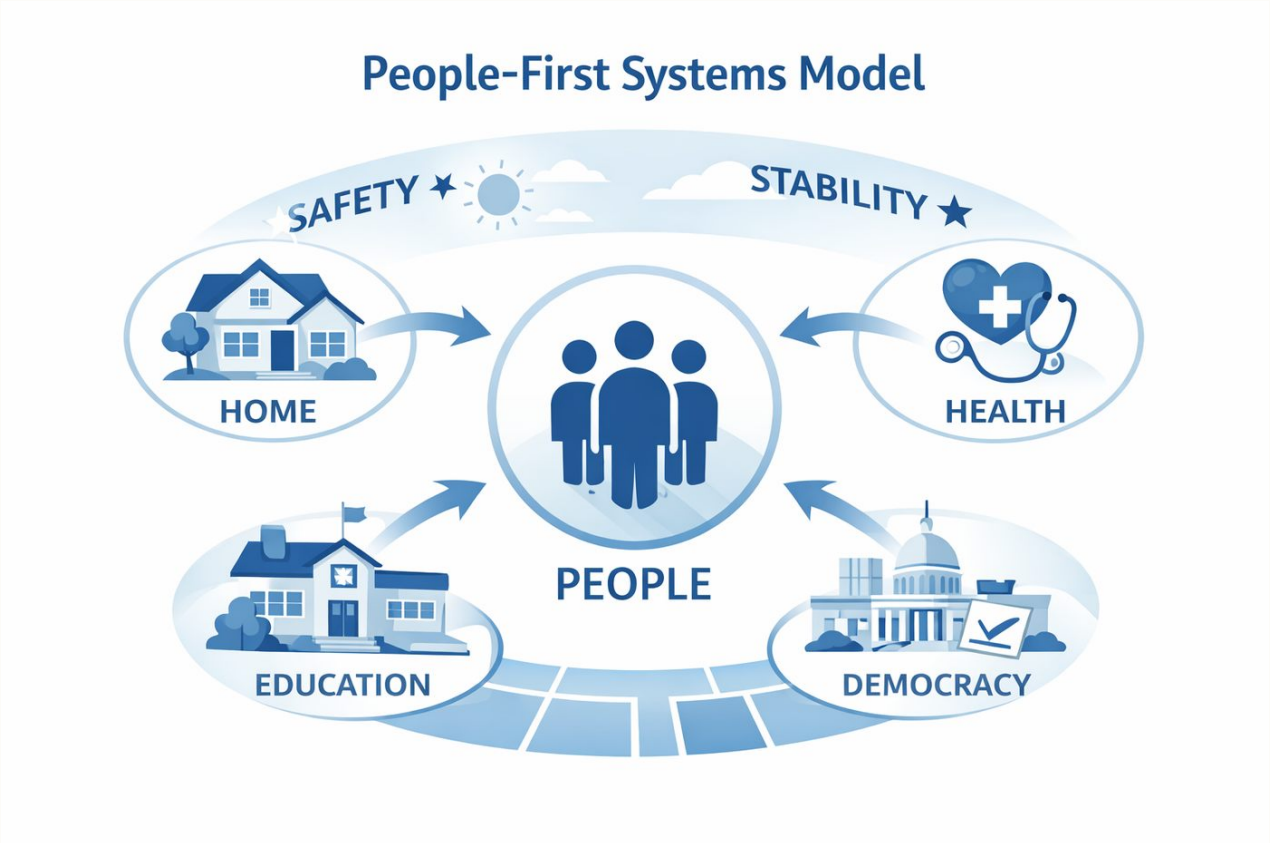

The United Systems Model is a new plan that focuses on people first. It is built with:

- clear logic
- fairness
- history
- basic math
- trauma understanding
- real human needs

This model is not about politics. It is about safety, stability, and dignity for everyone.

It starts with one simple idea:

A country works best when people have a home, good health, good education, and a voice that counts.

PHASE 1: UNIVERSAL HOUSING (THE FOUNDATION)

A country cannot function if people do not have a place to live.

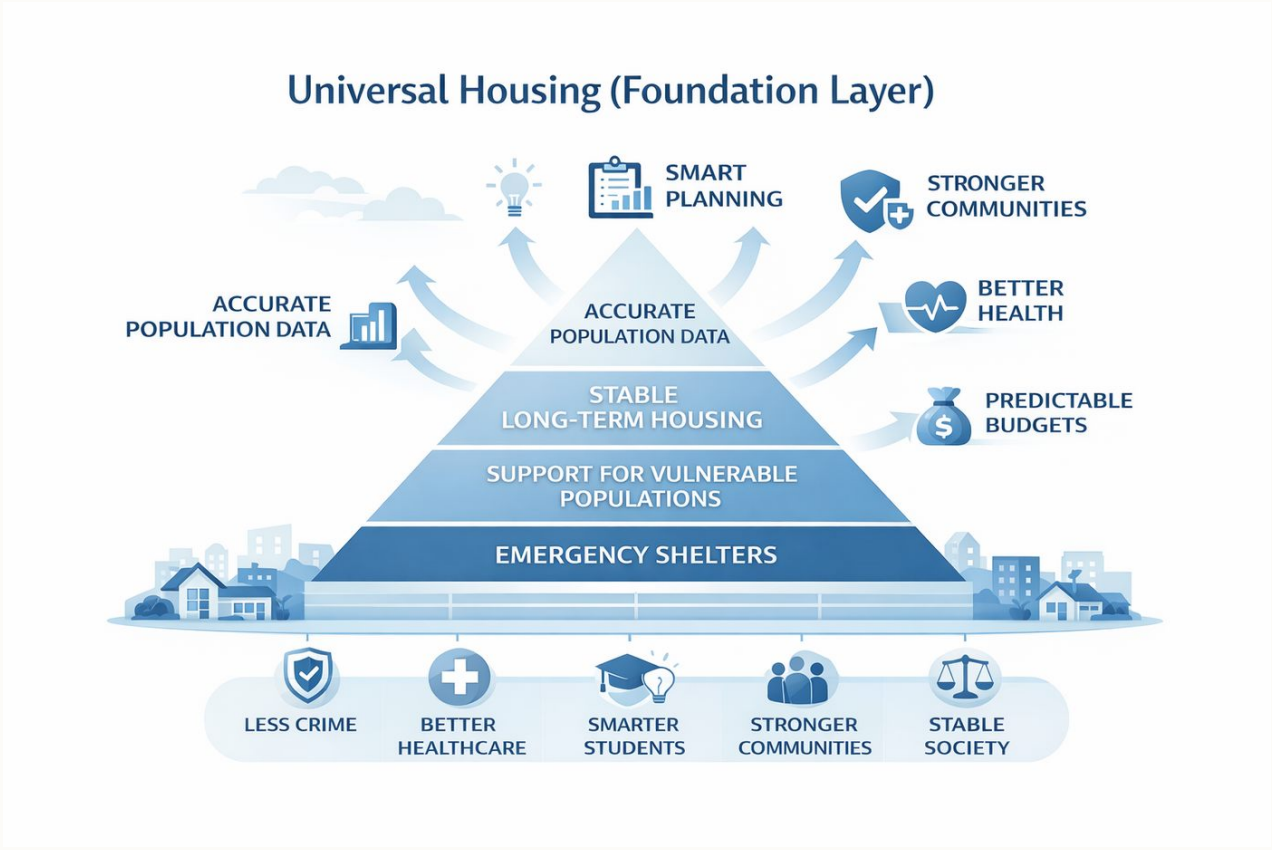

Housing First means:

- emergency shelters for people who need them
- safe long-term homes
- support for families and vulnerable groups
- good population numbers so we can plan
- stronger, safer communities

When everyone has stable housing:

- crime drops
- people stay healthier
- kids learn better
- families feel safer
- communities become stronger
- the government can plan better

Housing is Step 1 because everything else depends on it.

PHASE 2: UNIVERSAL HEALTHCARE (THE STABILITY LAYER)

After housing, health is the next most important need.

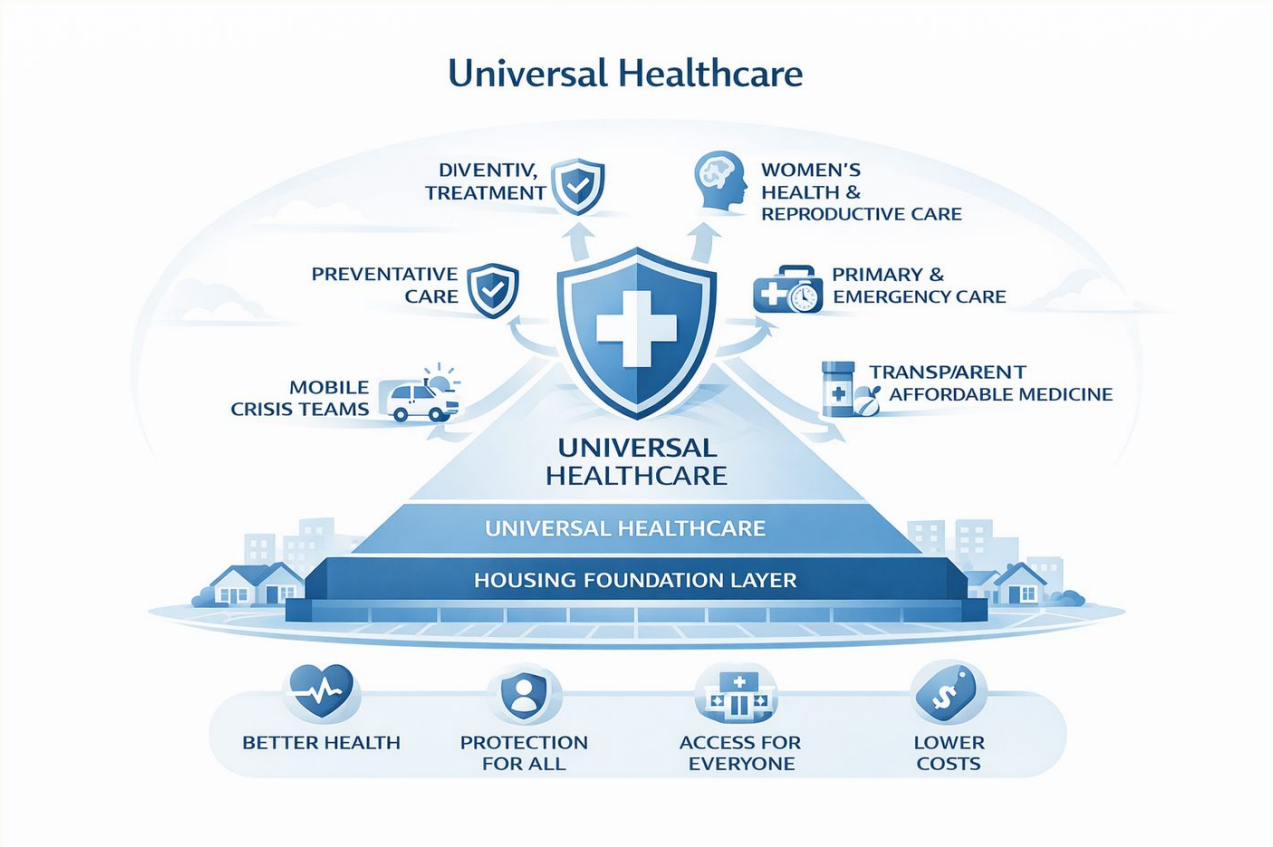

Universal Healthcare includes:

- regular doctor visits
- emergency care
- mental health support
- trauma care
- mobile crisis teams
- women’s health and safety
- help with long-term illnesses
- preventative care

A healthy population:

- works more

- needs fewer emergencies
- builds stronger communities
- costs less in the long run
- helps the whole country grow

PHASE 3: REBUILDING AMERICA'S INFRASTRUCTURE

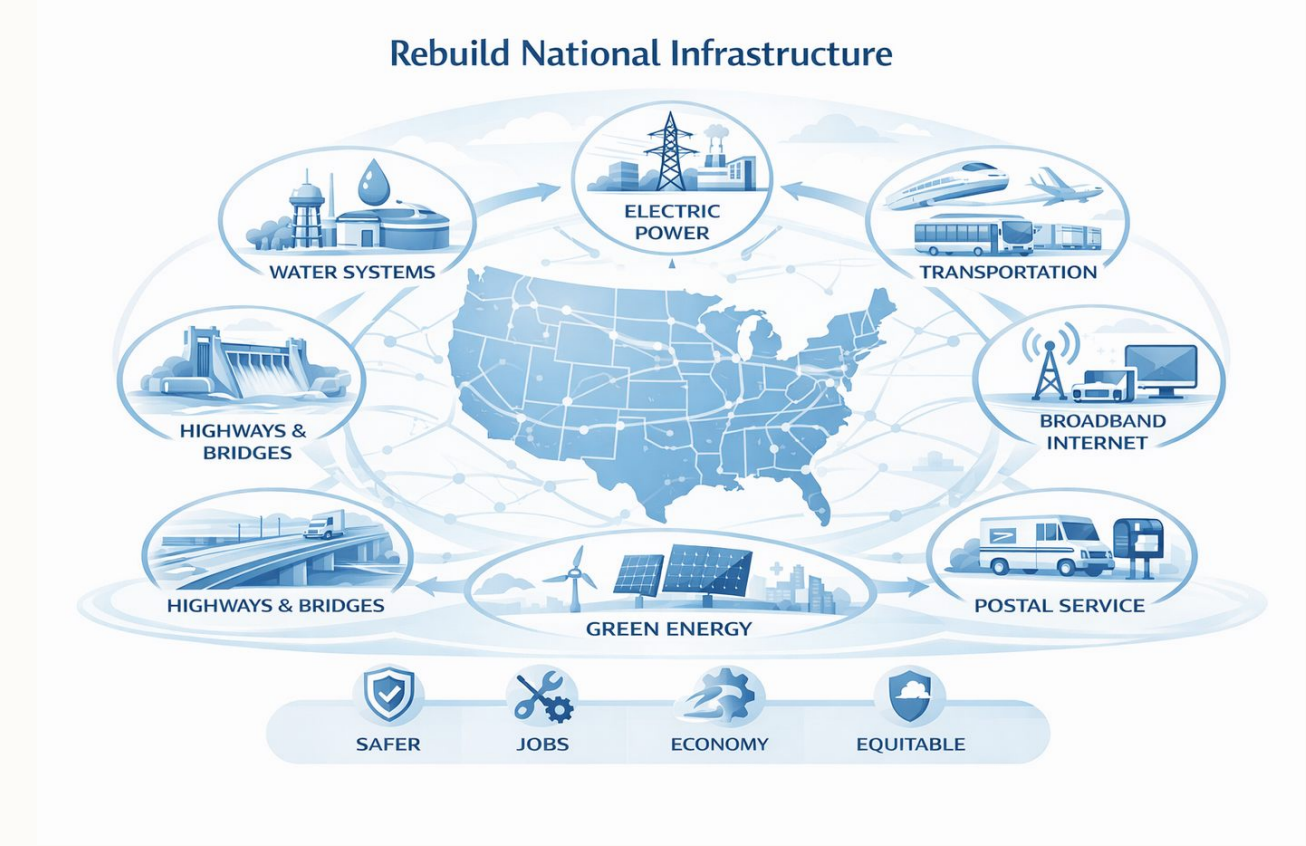

Once people are housed and healthy, we can finally rebuild our country.

This phase fixes and improves:

- water systems
- power grid
- roads and bridges
- public transportation
- climate-safe buildings

- digital access and public internet
- emergency readiness

Healthy, stable people create a strong workforce. A strong workforce builds a strong nation.

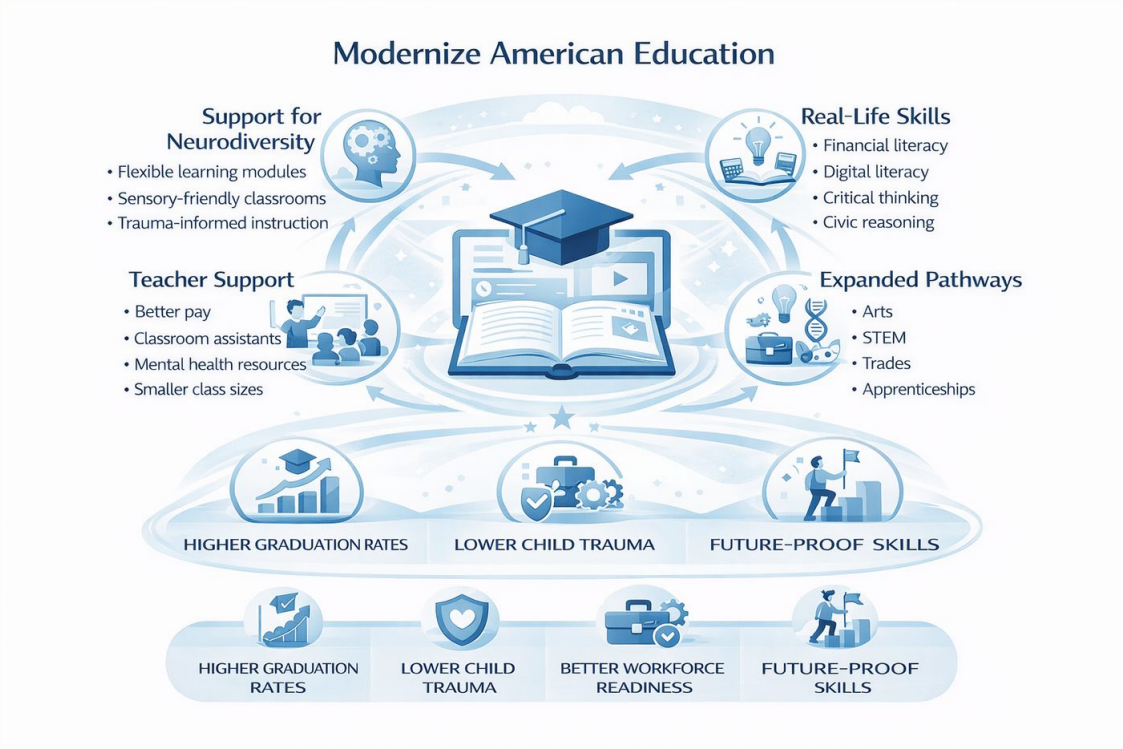

PHASE 4: EDUCATION FOR TODAY'S WORLD

Our schools were built for a world that no longer exists.

This model updates education to:

- support different types of brains
- teach real-life skills
- prepare kids for modern jobs
- lower classroom stress and trauma
- help teachers
- grow arts, STEM, and trades programs

Every child deserves a system designed for their brain — not one from 1950.

PHASE 5: FIXING DEMOCRACY & MAKING VOTING FAIR

A democracy only works when voting is easy, safe, and fair for everyone.

This model creates:

- universal mail-in voting
- full ADA access
- no more gerrymandering
- a national voting holiday
- open-source voting tech (fully transparent)
- third-party election oversight
- a citizen veto for major decisions

This brings back trust and transparency.

ANTI-CORRUPTION PROTECTION

To stop collapse, we add strong guardrails:

- billionaire wealth limits
- public-good rules for major systems
- no private companies controlling voting or taxes
- a clear, public spending ledger
- strong national oversight
- equal laws for everyone

Power is balanced. No one — not wealthy people, not corporations — can take control of the system.

THE CIVIC CONTRIBUTION LAYER

In this system, every person gets housing and healthcare. But every person also contributes to their community in a way that fits their skills, abilities, and energy.

Contribution can include:

- helping clean parks or rivers
- reading to children
- tutoring
- helping at libraries
- community gardening
- arts and culture work
- helping elders
- neighborhood support projects

Contribution is not punishment. It is dignity. Everyone belongs. Everyone helps. Everyone matters.

WHY THIS MODEL WORKS

History shows that countries collapse when:

- wealth becomes too concentrated
- people lose access to basic needs
- governments become unstable
- the public loses power

This new model:

- spreads safety
- spreads dignity
- spreads responsibility
- builds long-term stability
- reduces corruption
- supports innovation
- keeps communities strong

This is Version 1.0. It will grow and improve with feedback, experts, and real-world testing.

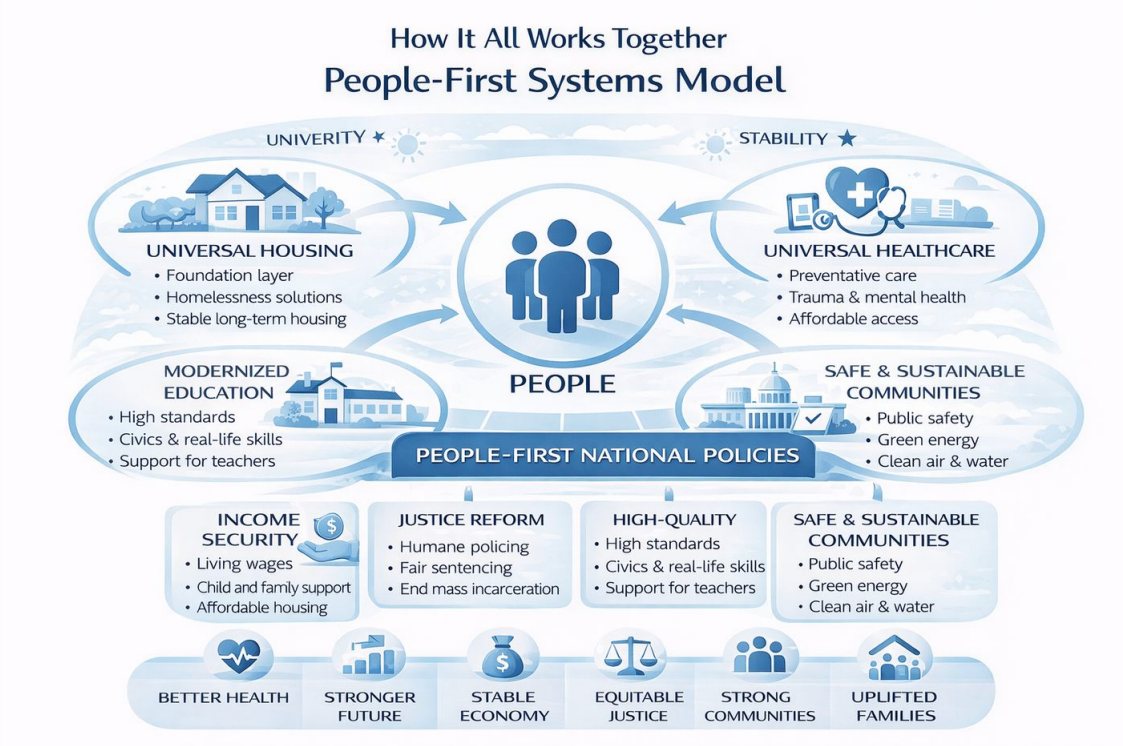

THE VISION

A safe, stable, healthy, educated America.

An America where:

- people have homes
- families feel supported
- workers feel safe
- communities are connected
- democracy is strong
- corruption is limited
- every voice matters

This model is built not for the past, but for the next 250 years.

How It All Works Together
People-First Systems Model
UNIVERITY
STABILITY
UNIVERSAL HOUSING
• Foundation layer
• Homelessness solutions
• Stable long-term housing
UNIVERSAL HEALTHCARE
• Preventative care
• Trauma & mental health
• Affordable access
PEOPLE
MODERNIZED EDUCATION
• High standards
• Civics & real-life skills
• Support for teachers
SAFE & SUSTAINABLE COMMUNITIES
• Public safety
• Green energy
• Clean air & water
PEOPLE-FIRST NATIONAL POLICIES
INCOME SECURITY
• Living wages
• Child and famly support
• Affordable housing
JUSTICE REFORM
• Humane policing
• Fair sentencing
• End mass incarceration
HIGH-QUALITY
• High standards
• Civics & real-life skills
• Support for teachers
SAFE & SUSTAINABLE COMMUNITIES
• Public safety
• Green energy
• Clean air & water
BETTER HEALTH
STRONGER FUTURE
STABLE ECONOMY
EQUITABLE JUSTICE
STRONG COMMUNITIES
UPLIFTED FAMILIES
